WHO ARE WE?

A non-profit, supra-curricular program guiding the most gifted Hungarian high school students in their academic orientation and university admission processes since 2010.

WHO ARE OUR STUDENTS?

Our students come from 110+ secondary schools in Hungary, with all the top 50 schools represented. Their academic interests are diverse, including STEM, social sciences, and arts and humanities.

WHAT DO WE DO?

We offer a 4+1 year program for students in grades 8-12, which consists of three pillars: one-on-one mentoring, an interdisciplinary module curriculum, and a rich student life community.

MILESTONE ACADEMIC PROGRAM

MENTORING

Each student has their own highly qualified mentor, who is well versed in our philosophy and the world of academia and/or business.

The main objectives of mentoring are:

- to find the student's area of interest that they will further explore in their undergraduate studies
- to harmonize and deepen the knowledge acquired inside and outside of Milestone
- to support the student in setting and achieving educational goals, including successful applications to top universities.

Find out about our students' achievements:

MODULES

Our modules are interactive, small group, interdisciplinary sessions that cover a wide range of fields and topics.

Our students (except in the Freshman year) choose their own modules. Thus each student sets their own curriculum with the support of their mentor. In each module, students learn in small groups (6-12 students) for one 50-minute lesson per week for 8 weeks.

Each year we offer close to a 100 different modules in the divisions of Natural Sciences, Numerical Sciences, Social Sciences, and Arts and Humanities.

View our module catalog:

STUDENT LIFE

Our student-run clubs and societies are based on the shared interests of their members and offer a wealth of experiences beyond the academic curriculum.

Currently, we have 17 clubs and societies. They are a true addition to the students' educational experience, as the Hungarian public education system does not provide such opportunities.

Some of our most popular clubs and societies are:

- Debate Society
- Engineering Society
- MUN Society
- Creative Writing Community
- Medical and Healthcare Society
- Chinese Club
